Wenyu Jiao

+86 15650709679 astrojiao@gmail.com wenyujiao@github.io

Research Interests

- Interferometric observations toward the cradle of high-mass stars
- Magnetic fields and dust polarization in star-forming regions
- Fragmentation and chemical evolution in infrared dark clouds
- Multi-scale gas flows associated with star formation activities

Education

2018 – 2024 **Peking University (PKU)**
Ph.D. candidate in Astrophysic. Supervisor: Prof. Ke Wang
Thesis: Exploring the Initial Conditions in High-mass Star Formation

2014 – 2018 **Peking University (PKU)**
B.S. in Astronomy. Supervisor: Prof. Ran Wang
Thesis: Submillimeter Study of A Giant Protocluster at z=5.7

Research Experience

2024.07 – now **Postdoc**
Shanghai Astronomical Observatory (SHAO). Collarborators: Prof. Tie Liu, Prof. Xing Lu

2023.02 – 2024.02 **Guest Researcher**
Max Planck Institute for Astronomy (MPIA). Supervisor: Prof. Henrik Beuther
Investigating the role of magnetic fields in high-mass star formation using ALMA high-resolution dust polarization data.

2022.08 – 2023.02 **Visitor**
Yunnan University (YNU)

Mentoring Experience

2024–now Co-mentor of two graduate students (Yang, Yuhan and Jiao, Yunfan) at Shanghai Astronomical Observatory (SHAO)

2021 Co-mentor of National Talent Program for high school student (Xie, Jiahe): "Exploring the relation between $^{13}CO/C^{18}O$ and H_2 in the galactic plane", current: Bachelor student at Beihang University

Mentoring Experience (continued)

2021 Co-mentor of undergraduate project (Huang, Haomiao): "The initial stage of star formation: Observational study of dense cloud cores with extremely low luminosity/mass ratio", current: Ph.D. student in National Astronomical Observatories, Chinese Academy of Sciences (NAOC, China)

2020 Co-mentor of a visiting student (Huang, Bo): "High-mass Starless Clumps: Dynamical State and Correlation between Physical Parameters", current: Postdoc at Korea Astronomy and Space Science Institute (KASI, South Korea)

Honors, Awards and Grants

2024 **Shanghai Post-doctoral Excellence Program**, Shanghai

2022 **China Scholarship Council fellowship**, China

2021 **Excellent Research Award**, Peking University

2019 **Presidential Scholarship**, Peking University

2019 **Canon Scholarship**, Peking University

2019 **Merit Student**, Peking University

Telescope Observing Projects

- "Probing the Initial conditions of extremely cold and low luminosity-to-mass ratio high-mass starless clumps within 3.5 kpc", SMA, 2021B-S032, **PI**, 3 tracks allocated, 2 tracks observed.
- "Magnetic Fields in Supercritical Massive Filaments", ALMA, 2025.1.00883.S, **Co-PI**
- "Penetrating the "thickness": high-resolution 3mm survey unveil REAL core mass in massive clumps", ALMA, 2025.1.00542.S, PI: Siju Zhang, Co-I
- "What is the importance of the Magnetic Field in the Formation of High-mass Stars?", ALMA, 2025.1.01549.S, PI: Patricio Sanhueza, Co-I
- "Panoramic view of how massive protoclusters form in hub-filament systems", ALMA, 2025.1.00044.S, PI: Guido Garay, Co-I
- "The origin of the wide-spread shocks in the Central Molecular Zone: excitation conditions in outflows and slim filaments", ALMA, 2024.1.00213.S, PI: Junhao Liu, Co-I
- "Magnetic Fields in Massive Collapsing Clumps", ALMA, 2023.1.01606.S, PI: Lei Zhu, Co-I
- "Tracing the core mass growth in filaments", NOEMA, PI: Shanghuo Li, Co-I
- "How really massive are protostellar cores? Determining the cm SED by ATCA", ATCA, PI: Fengwei Xu, Co-I

Selected Talks

2025 **Perspective in Star Formation—Senior Insights, Young Visions**, Shanghai, China
"From ATOMS to QUARKS: Unveiling the Mechanisms of Massive Star Formation with ALMA", Shanghai, Selected talk

JCMT Users Meeting, Chiang Mai, Thailand
"SPACE: Submillimeter Polarization and Astro-Chemistry in Earliest star formation", Selected talk

2024 **Academic Symposium on Molecular Clouds and Star Formation**, Guangxi, China
"The Role of Magnetic Fields in G335.579-0.292", Selected talk

Annual Meeting of the Chinese Astronomical Society, Zhejiang, China
"Gravitational Shaping of Magnetic Fields and Their Interplay with Gas Streamers in G335.579-0.292", Selected talk

2022 **Academic Symposium on Molecular Clouds and Star Formation** (remote)
"Are There High-mass Prestellar Cores in Orion?", Selected talk

2022 **CASSACA ALMA user meeting** (remote)
"Exploring the Initial Conditions in High-Mass Star Formation Using ALMA Data", Selected talk

Services

2025	LOC Chair of "Perspectives in Star Formation — Senior Insights, Young Visions" Workshop in Shanghai with 140 participants
2021	Organizer of PKU Undergraduate Astronomy Symposium
2021	Teaching assistant of Modern Astronomy Course, Peking University
2020	Teaching assistant of ALMA Data Reduction Workshop, Yunnan Province, China
2020	Operating staff for Official WeChat Public Account of "Peking University Astronomy"
2019-2022	Mentor of the 2019 DoA undergraduate class, School of Physics, Peking University

Skills

Software	CASA, CARTA, RADMC-3D, RADEX, GILDAS, $getsf$, DS9
Analysis	ALMA, IRAM 30m, SMA, JCMT, APEX, Herschel, Planck, Nobeyama 45m
